

Special Topics in Geology: Age of Mammals
 GEOL 4950 - 3 credits - Spring Semester
 Tuesday & Thursdays, 8:00 – 9:27 AM
 Dr. Julia Sankey, Dept of Physics and Geology

The evolutionary history of mammals during the Cenozoic (“Age of Mammals”), the last 65 million years of Earth’s history, including the changing geographic and climatic conditions. One field trip.

A MIDDLE EOCENE

B EARLY OLIGOCENE

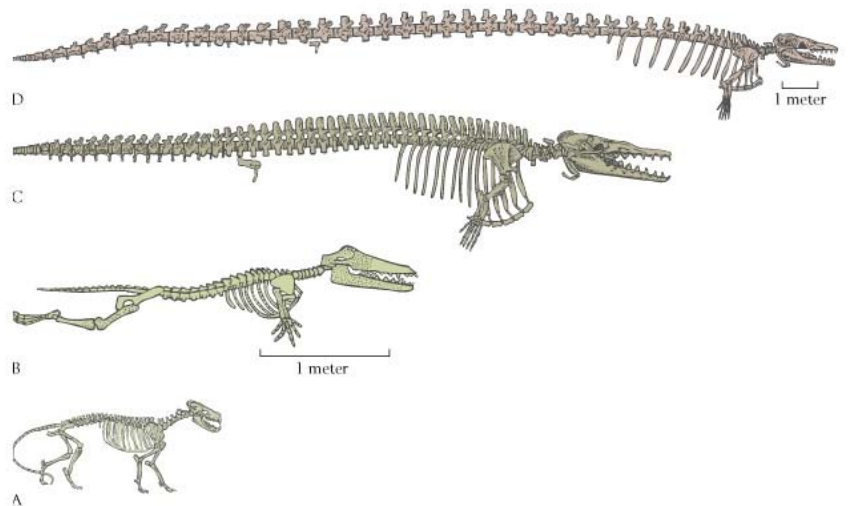

Figure above - What do plate tectonics, changes in ocean circulation around Antarctica, and whale evolution have in common?
